

The site development project will help Four Winds to

Grow & Flourish

because it will allow us to...

Create a regional native species arboretum and conserve the site as a loved local resource for future generations to visit and enjoy.

Develop a unique habitat for wildlife.

Showcase native plant species and land management techniques relevant and applicable for local gardens.

Provide a place for quiet enjoyment and education amongst the natural flora and fauna.

Strengthen our connection to the local indigenous community.

Create accessible spaces for spectacular outdoor events and performances - drama, music and cinema.

Develop a magical setting to inspire artists-in-residence to create extraordinary work.

Establish new paths, picnic areas, benches, tables, fire pits, lighting, signage, a bridge and plant more trees. These new additions will be accessible to all visitors, including those with disabilities.
